

PAIRS TRADING

KEY FEATURES

TRADES

Trade spot, futures and perpetual swaps on one or both legs of the pair

LINK

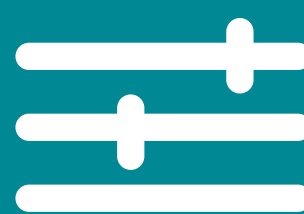

Links in-house signals or bots to the pairs algorithms in Caspian

PARALLEL

Run many “spreads” in parallel utilizing on-screen dashboard alerts to help capture alpha across many exchanges at once

FINE TUNE

Fine tune the various algo parameters to control the aggression levels on each leg taking into account the differing liquidity levels

SET RULES

Set rules to automatically control hedge risk in a granular way

REDUCE TIME

Reduce pair set-up times by cloning existing pairs and opening new pairs from dedicated watchlists

ON THE FLY

Monitor order progression slice-by-slice and amend pairs orders on-the-fly
